

- **ClimateCoop Foundation** is a non-profit NGO in the public sector
- It has the ownership of the ClimateCoop Platform
- It is responsible to supervise the sustainability of ClimateCoop (note that ClimateCoop is self-sustaining via a Treasury System)
- It is responsible to manage ClimateCoop within the rich SDG Ecosystem
- It is responsible to scale ClimateCoop globally and roll out around the World
- It has contracted dCentra to deliver the ClimateCoop Platform and will request 3rd Party Audits to follow up the delivery
- There are no officials from dCentra taking any position in ClimateCoop to ensure it's a completely independent, separate and autonomous entity without any conflict of interest
- ...

### Collaboration Options for Organizations

### Collaboration Options for Private Individuals

- **dCentra** is a traditional German software engineering company in the private sector
- It is contracted by ClimateCoop Foundation to deliver the ClimateCoop Platform
- It owns all the technology IPs related to the distributed global self-sustaining Value Network
- Apart from ClimateCoop it manages a portfolio of other Software Products
- It has couple of R&D streams within the blockchain domain
- It provides Consulting Services within the blockchain domain
- It is the Company that would trigger the commercial spin-off of the Value Network to target Fortune 500 organizations & governments (note that this would require additional new entities such as a license holder or a consulting company, which are not depicted in this context)
- ...
